elevator market

Global elevator market est. \$200B+ by 2030

pitfalls of home elevators

- B**ulky metal clutter & poor design
- U**nsafe – fall & injury hazard
- M**iserably slow & noisy
- M**aintenance excessive
- E**xpensive to buy, costly to install
- R**estricted to retrofit installations

AirLift – reimagine your vertical ride

- A** esthetically pleasing design
- I** deal for personal vertical mobility
- R** ecyclable, eco-friendly, low power
- L** ow cost, Low maintenance
- I** nsanely space efficient
- F** allproof, Failproof, Fireproof
- T** op notch safety

no strings attached

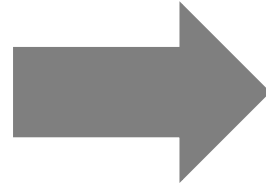

eliminating the clutter

from traditional design:

- ✗ no rails
- ✗ no guides
- ✗ no cables
- ✗ no ropes
- ✗ no pulleys
- ✗ no chains
- ✗ no push-pins
- ✗ no gearboxes
- ✗ no lubrication
- ✗ no metal skeleton
- ✗ no counterweight
- ✗ no concrete shaft
- ✗ no dangling cables

replacing with:

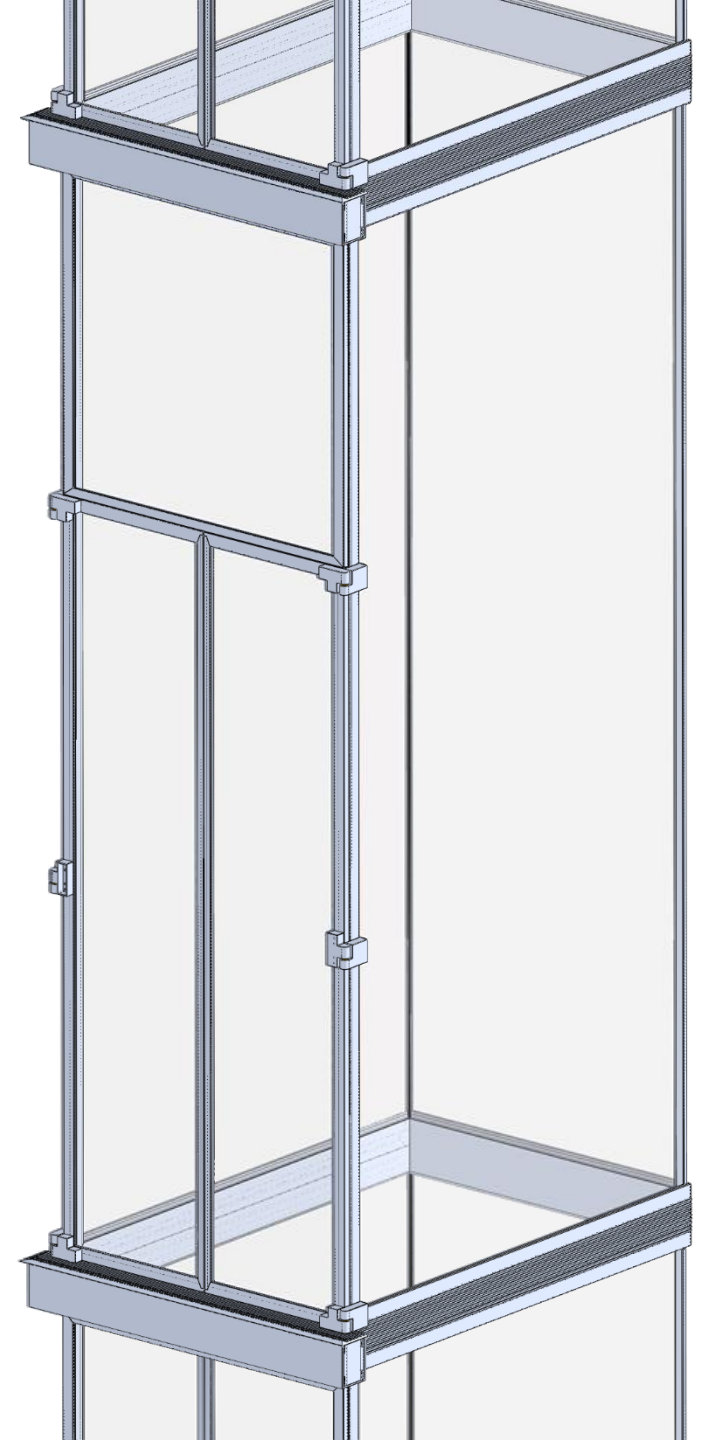

tempered glass &
vacuum technology

how it works

- cabin is an airtight capsule gliding in an airtight hoistway
- parks at the destination floor during loading and unloading
- vacuum compressor creates low air pressure above the cabin
- this pressure difference above and below the cabin pushes the cabin up or lets the cabin to descend
- ride is fast, smooth and quiet, with gentle whisper of the air

user benefits (see customer pitch-deck for details)

lower cost, lower maintenance

- lower cost of ownership
- lower cost of maintenance

asset with elegant appeal

- clutter-free display
- panoramic & boltless design

safe and eco-friendly

- fallproof, fireproof, unbreakable
- lubricant-free, recyclable

space efficient

- 3-5X smaller footprint
- retrofit friendly

ADA-compliant

- wheelchair friendly, ADA-compliant

- during power **outage** slowly **descends**
- doors will **open automatically**

child-safe

- **door-lock** mechanism, **tamperproof**
- **no gaps**, no holes, no trenches, **injury-proof**

unbreakable

- **shockproof**, **shatterproof**, **scratchproof**
- **earthquake-safe** construction

fallproof

- **failsafe** cabin
- **failproof** emergency **brakes**

fireproof

- **fireproof** hoistway and cabin
- may serve as a **fire-escape**

parking brakes

- doors **locked** when **in motion**
- **parks** at the stop **floor**

market players

direct competition – AirLift vs PVE

AIRLIFT™

- tempered glass exoskeleton
- fallproof, fireproof, trap-proof
- non-scratchable, unbreakable
- 5x faster & 10x quieter
- ADA-ready, fully automated

the **TESLA** of elevators

PVE

- metal clutter with plastic tinted shaft
- pierceable by a screwdriver, easily burns
- extremely loud, power outage unfriendly
- jerky, clumsy and slow
- non-ADA, manual doors

order now – make your neighbors jealous
